Dezone can offer the most suitable and cost effective solution to municipal wastewater treatment based on the latest process technologies.

Wastewater application:

- Physical treatment
  - Screening
  - Grit and grease removal
  - Primary sedimentation
- Chemical treatment
  - Coagulation
  - Precipitation
  - Neutralization
  - Stabilization
- Biological treatment
  - Suspended growth treatment process
  - Attached growth treatment process
  - Aerobic biological oxidation
  - Biological nitrification and denitrification
  - Biological phosphorous removal
  - Anaerobic fermentation and oxidation
- Advance treatment
  - Filtration
  - Adsorption
  - Stripping
  - Distillation
  - Disinfection
    - Disinfection with chlorine
    - Disinfection with ozone
    - Disinfection with other chemical
    - UV radiation

Bio solids treatment

- Thickening
- Stabilization
- Anaerobic digestion
- Aerobic digestion
- Composting
- Conditioning
- Dewatering
- Heat drying
